EXPERIENCE

Acme Corporation

Software Engineer

San Francisco, CA

2020-2023

- Developed and maintained 3 key features for a flagship product using Angular 11+, resulting in a 20% increase in user engagement.
- Implemented RESTful APIs using C# and .NET, improving API response times by 15%.
- Deployed and managed applications on AWS using Kubernetes and Docker, achieving 99.99% uptime.

PROJECTS

E-commerce Platform

2022

- Developed a scalable e-commerce platform using Angular 11+ for the front-end and C#/.NET for the back-end, resulting in a 10% increase in sales.
- Implemented a robust payment gateway integration, improving transaction success rate by 5%.
- Deployed the application on AWS using Kubernetes for high availability and scalability.

Microservices Architecture Implementation

2021

- Refactored a monolithic application into a microservices architecture using Docker and Kubernetes, improving application performance by 30%.
- Reduced infrastructure costs by 15% through optimized resource allocation.
- Improved application scalability by 20%.

Cloud-Based Inventory Management System

2020

- Designed and developed a cloud-based inventory management system using C# and .NET, resulting in a 25% reduction in inventory errors.
- Improved data accuracy by 15% through automated data validation.
- Integrated the system with existing ERP software, improving data synchronization by 20%.
