EXPERIENCE

Example Company

Data Analyst

Example City, State

2020-2023

- Developed and maintained 5 key performance indicator (KPI) dashboards, resulting in a 10% improvement in operational efficiency.
- Conducted in-depth data analysis using SQL and Python, identifying trends that informed strategic decision-making.
- Collaborated with cross-functional teams to gather data requirements and translate them into actionable reports, delivered 20+ reports monthly to stakeholders

PROJECTS

Sales Performance Analysis

2022

- Analyzed sales data from multiple sources (CRM, ERP) to identify top-performing products and regions.
- Developed a predictive model using machine learning to forecast future sales with 90% accuracy.
- Presented findings and recommendations to executive leadership resulting in a 15% increase in sales strategy efficacy.

Customer Churn Prediction

2021

- Built a predictive model to identify at-risk customers using statistical modeling techniques (logistic regression).
- Reduced customer churn rate by 5% through targeted retention strategies based on model predictions.
- Improved customer satisfaction scores by 10% via enhanced communication based on identified customer needs.

Marketing Campaign Optimization

2020

- Analyzed marketing campaign data to identify key drivers of campaign success and areas for improvement.
- Optimized marketing campaigns, increasing conversion rates by 8% through targeted ad spend and refined messaging.
- Improved return on investment (ROI) for marketing campaigns by 12% based on data-driven optimizations.
