## EXPERIENCE

Acme Corporation

Senior Software Engineer

New York, NY

2020-Present

- Designed and implemented 3 microservices using Spring Boot, resulting in a 20% increase in application performance.
- Led a team of 4 engineers in the development of a new customer portal, reducing customer support tickets by 15%.
- Improved application security by implementing SAML authentication, reducing security vulnerabilities by 30%.

## PROJECTS

High-Performance Customer Portal

2022-2023

- Developed a scalable, high-performance customer portal using Java, Spring Boot, and React, resulting in a 10% increase in customer satisfaction.
- Implemented a microservices architecture to improve system resilience and scalability.
- Integrated with Azure DevOps for CI/CD, reducing deployment time by 50%.

Secure RESTful API

2021-2022

- Designed and implemented a secure RESTful API using Spring Boot and OAuth 2.0, ensuring secure access to sensitive customer data.
- Implemented robust error handling and logging to improve system reliability.
- Achieved 99.99% uptime for the API.

Cloud Migration Project

2020-2021

- Migrated a legacy application to Azure cloud infrastructure, reducing infrastructure costs by 25%.
- Implemented infrastructure as code using Terraform.
- Improved application performance by 15% through optimization of cloud resources.
