## PROJECTS

**E-commerce Platform using Java/J2EE and Angular**

*2023-2024*

- Developed a robust e-commerce platform using Core Java/J2EE, Angular, and an Oracle database.
- Implemented RESTful APIs using Jersey, handling over 1000 requests per second.
- Improved site performance by 20% through database optimization using SQL and PL/SQL.

**Internal Data Management System**

*2022-2023*

- Designed and implemented a data management system using SQL and PL/SQL for efficient data storage and retrieval.
- Improved data accuracy by 10% through implementing data validation checks and error handling.
- Successfully migrated data from legacy systems, minimizing downtime.

**Personal Portfolio Website**

*2022*

- Built a responsive portfolio website using HTML, CSS, and JavaScript showcasing my skills and projects.
- Integrated the website with a backend using simple REST API for functionality.
- Improved website accessibility and SEO.
