## EXPERIENCE

Acme Corporation

Senior Software Engineer

San Francisco, CA

2020-Present

- Designed and implemented 3 microservices using Spring Boot, resulting in a 20% increase in application performance.
- Led the migration of 2 legacy applications to Azure, reducing infrastructure costs by 15%.
- Mentored junior engineers in best practices for software development and DevOps.
- Improved code quality by 10% through implementing rigorous code reviews and automated testing.

## PROJECTS

GEICO Customer Portal Redesign

2022-2023

- Redesigned the GEICO customer portal using React and Node.js, improving user experience by 30% (measured by task completion time).
- Implemented a new authentication system using OAuth 2.0, increasing security by 25% (reduced successful breaches by 25%).
- Integrated with Azure Active Directory for seamless user login and authorization.

Scalable Claims Processing System

2021-2022

- Developed a highly scalable claims processing system using Java, Spring Boot, and Kubernetes, handling a 40% increase in claims volume.
- Implemented continuous integration and continuous deployment (CI/CD) pipelines using Azure DevOps, reducing deployment time by 50%.
- Improved system reliability by 20% through implementing robust error handling and monitoring.

Secure API Gateway

2020-2021

- Designed and implemented a secure API gateway using Nginx and Kong, protecting 100+ APIs from unauthorized access.
- Implemented rate limiting and request filtering to prevent denial-of-service attacks.
- Integrated with Azure Monitor for real-time monitoring and alerting.
