PROJECTS

E-commerce Platform with Java and Angular

2025-2024

- Developed a scalable e-commerce platform using Java/J2EE, Jersey RESTful APIs, and Angular for the front-end, resulting in a 20% increase in transaction speed.
- Implemented robust data management using Oracle Database and PL/SQL, ensuring data integrity and efficient query execution.
- Utilized HTML/CSS for responsive design, enhancing user experience across various devices.

Inventory Management System

2024-2023

- Designed and implemented an inventory management system using Core Java, improving inventory accuracy by 10%.
- Developed RESTful APIs using Jersey to integrate with other systems.
- Utilized SQL and PL/SQL for efficient data retrieval and manipulation within an Oracle database.

Data Analysis Dashboard

2023-2022

- Created a data analysis dashboard using HTML, CSS, and JavaScript to visualize key business metrics.
- Improved data visualization and reporting, leading to better informed decision-making.
- Integrated the dashboard with an Oracle database for real-time data updates.
