## **EXPERIENCE**

## Previous Company Name

**Previous Location** 

Senior Software Engineer

YYYY-YYYY

- Designed and implemented 3 scalable microservices using Spring Boot, resulting in a 20% increase in application performance.
- Led code reviews for a team of 5 engineers, improving code quality and reducing bug count by 15%.
- Mentored junior engineers on best practices in software development and DevOps, leading to a 10% improvement in team efficiency.

#### **PROJECTS**

## **High-Availability Web Application**

YYYY-YYYY

- Developed a high-availability web application using Java, Spring Boot, and Azure, achieving 99.99% uptime.
- Implemented a microservices architecture with RESTful APIs, improving scalability and maintainability.
- Integrated with Azure DevOps for continuous integration and continuous delivery (CI/CD), reducing deployment time by 50%.

### Secure Customer Portal

YYYY-YYYY

- Designed and implemented a secure customer portal using Spring Security and OAuth 2.0, protecting sensitive customer data.
- Integrated with Active Directory for user authentication and authorization.
- Improved user experience by 25% through UI/UX improvements and performance optimization.

## **Automated Testing Framework**

YYYY-YYYY

- Developed an automated testing framework using Selenium and JUnit, increasing test coverage by 30%.
- Reduced manual testing time by 40%, freeing up resources for other development tasks.
- Implemented continuous testing as part of the CI/CD pipeline, improving software quality and reducing bugs.
