EXPERIENCE

sdjhfasdhf **sdkjahfsdhf**

gsdfhjksdhfjh *3874sdfh*

- Developed and maintained critical software applications for large-scale enterprise clients, resulting in improved efficiency and user experience.

PROJECTS

Enterprise Logistics Platform *2021-2022*

- Developed a scalable, high-performance logistics platform using Django and Azure, handling millions of transactions daily.
- Designed and implemented new API specifications, improving data integration with third-party systems.
- Utilized Power BI to create comprehensive dashboards, providing real-time insights into operational performance, leading to a 15% reduction in operational costs.

FinTech Fraud Detection System *2020-2021*

- Architected and implemented a robust fraud detection system using machine learning algorithms and Flask, resulting in a 20% decrease in fraudulent transactions.
- Integrated the system with existing banking infrastructure, ensuring seamless data flow and minimal disruption to operations.
- Improved system maintainability by implementing comprehensive documentation and automated testing procedures.

Insurance Claims Processing System *2022-2023*

- Led the development of a new claims processing system, improving processing speed by 30% and reducing manual intervention.
- Implemented a user-friendly interface, enhancing the customer experience and satisfaction.
- Successfully migrated the system to Azure, ensuring scalability and high availability.
