EXPERIENCE

Example Company   **Remote**

Senior Software Engineer   *2016-2023*

- Led development of a new customer-facing API, resulting in a 20% increase in transaction volume.
- Architected and implemented a microservices-based system, improving system scalability by 30%.
- Mentored junior engineers, fostering a collaborative and high-performing team environment.

PROJECTS

Enterprise Logistics Platform   *2021-2023*

- Developed a scalable, high-performance logistics platform for a Fortune 500 company using Django and Azure.
- Implemented robust security measures, ensuring compliance with industry regulations (PCI DSS).
- Improved data processing efficiency by 15% through optimized database queries and caching strategies.

FinTech Transaction Processing System   *2019-2021*

- Designed and implemented a real-time transaction processing system for a leading FinTech firm using Flask and Power BI for data visualization.
- Reduced transaction processing time by 25% through performance optimization and code refactoring.
- Successfully integrated the system with multiple third-party APIs, ensuring seamless data exchange.

Insurance Claims Processing Application   *2017-2019*

- Built a user-friendly insurance claims processing application using PowerApps, improving user satisfaction by 18%.
- Automated key processes, reducing manual effort by 40% and increasing throughput.
- Implemented comprehensive data security measures, ensuring compliance with HIPAA regulations.
