EXPERIENCE

Example Company   **Example City, MI**

Software Engineer   *2020-2023*

- Developed and maintained 3 key features for a Java-based enterprise application using Core Java/J2EE, resulting in a 15% increase in user engagement.
- Improved database performance by 20% by optimizing SQL queries and implementing PL/SQL procedures in an Oracle database environment.
- Collaborated with cross-functional teams to design, develop, and deploy web applications using HTML, CSS, and Jersey RESTful APIs.

PROJECTS

E-commerce Platform Development   *2022*

- Developed a scalable e-commerce platform using Core Java, Jersey REST APIs, and an Oracle database, processing over 1000 transactions per hour.
- Implemented a robust security system to protect sensitive user data, reducing security vulnerabilities by 10%.
- Improved website performance by 15% through front-end optimization using HTML and CSS, leading to increased user satisfaction.

Inventory Management System   *2021*

- Designed and implemented an inventory management system using Java, SQL, and PL/SQL, improving inventory accuracy by 8%.
- Reduced manual data entry by 25% through automation using Java and database triggers.
- Integrated the system with existing company databases through efficient data migration techniques.

Data Analysis Dashboard   *2020*

- Created an interactive data analysis dashboard using Angular and Typescript to visualize key business metrics.
- Improved data visualization and reporting, leading to a 10% increase in data-driven decision-making.
- Integrated the dashboard with existing databases using SQL queries and API calls.
